

Release Note

Alamut Visual Plus version 1.1

April 27, 2021

We are constantly working to enhance our variant annotation features while improving the user-friendly experience of Alamut Visual Plus for you!

NEW

Application Programming Interface (API)

Alamut Visual Plus now integrates API that enables access of the users' external tools to be easily reached through the search bar feature.

Private Annotations Display

Users now have the option to manually select DNA sequences and automatically import them through a new dedicated track (e.g., sequence-based annotations including PCR primers, probes, etc.).

Data Server for North America

With this release, users can benefit from a new data server, enabling faster data visualization.

UPDATED

With this release, the following features have been updated:

- **ACMG evidence description is included in “final report”**
- **Full display of genes is now possible in “chromosome view”**
- **Splicing and missense scores are added in “variant exporter” tab**
- **Updated design of “settings” window with improved view configuration**
- **Font size of “variant panel” is increased**
- **Installation of Alamut Visual Plus is available from a shared folder**

- Proxy and low connectivity issues are sorted

The release of Alamut Visual Plus version 1.1 can be downloaded from the [Extranet](#) from **Tuesday April 27, 2021** onwards.

Please consult our regularly updated [User Manual](#) to find out more about the new and updated features in the current Release Note.
